Laboratory Exercise No. 4

Working with Database and MVC in LavaLust
User Management Module

Name: Jastine Opredo

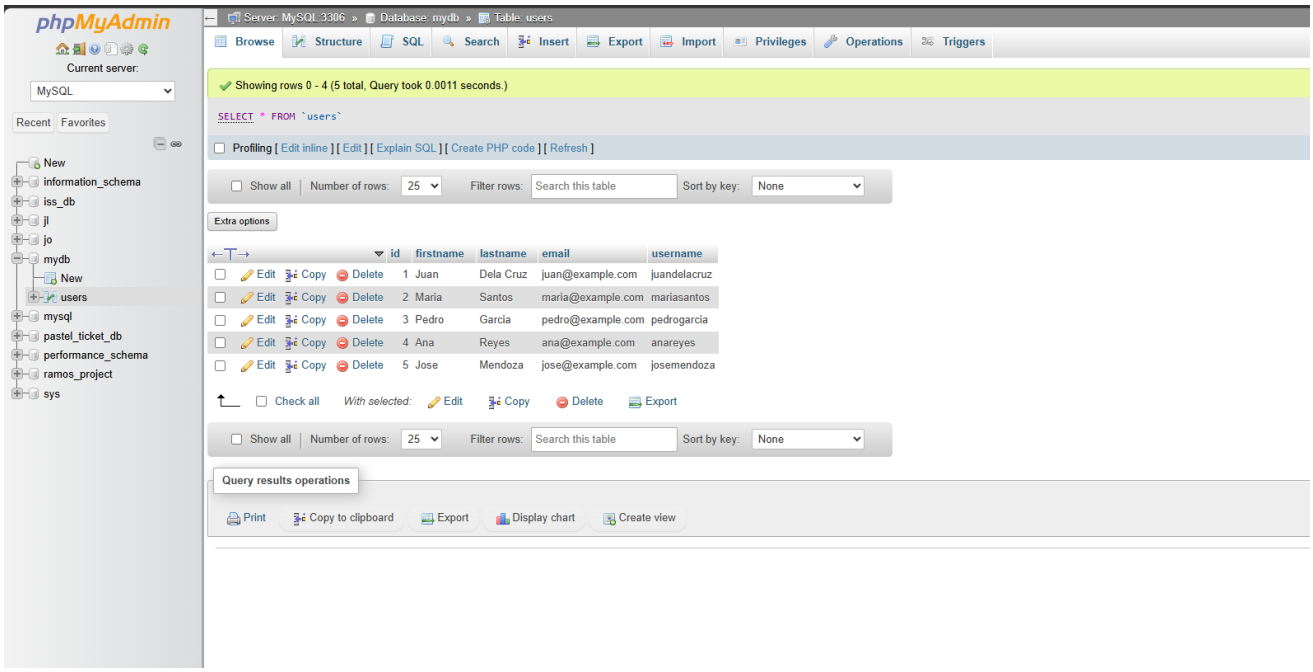

Course: Web Systems and Technologies 2

Render Link: https://opredo-jastine-lab4.onrender.com/index.php/users

---

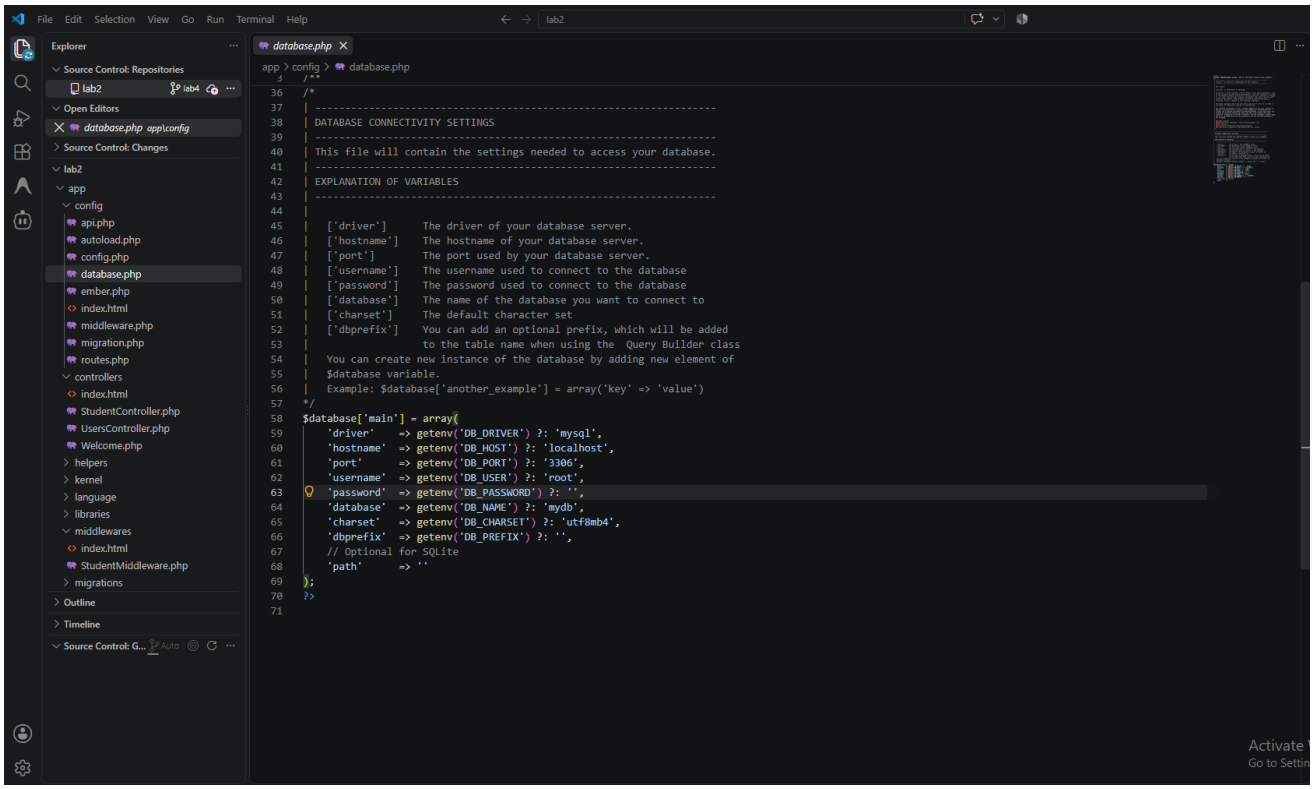

1. Database Screenshot

mydb.users table browsed via phpMyAdmin, confirming all 5 records stored:

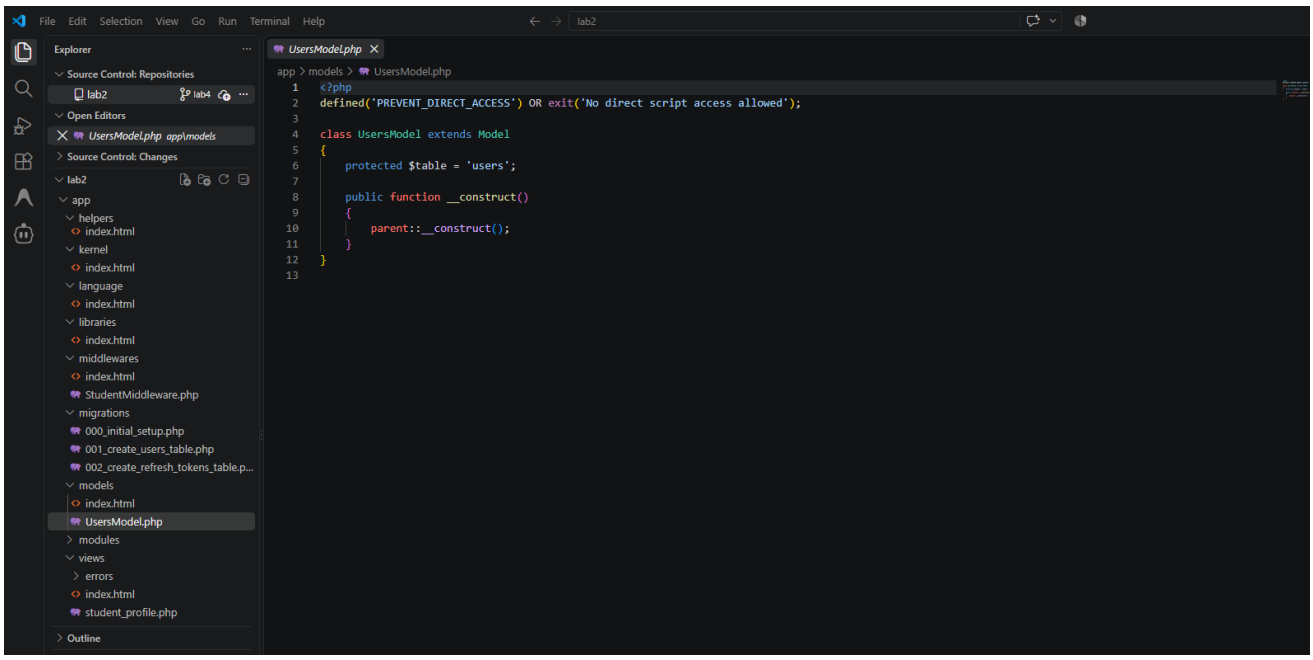

2. Database Configuration Screenshot

app/config/database.php — reads credentials from environment variables (Render) with local WAMP fallbacks. No password is hardcoded or exposed:

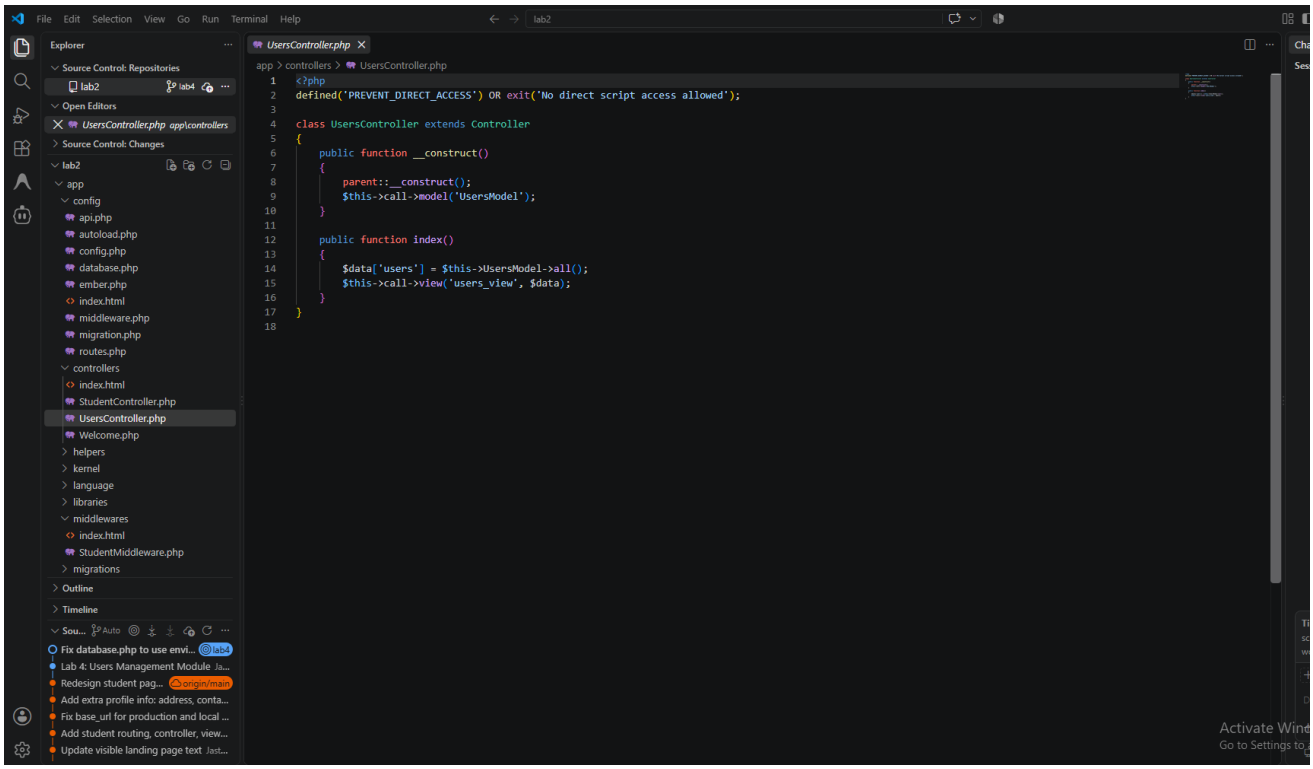

3. Model Screenshot

app/models/UsersModel.php:

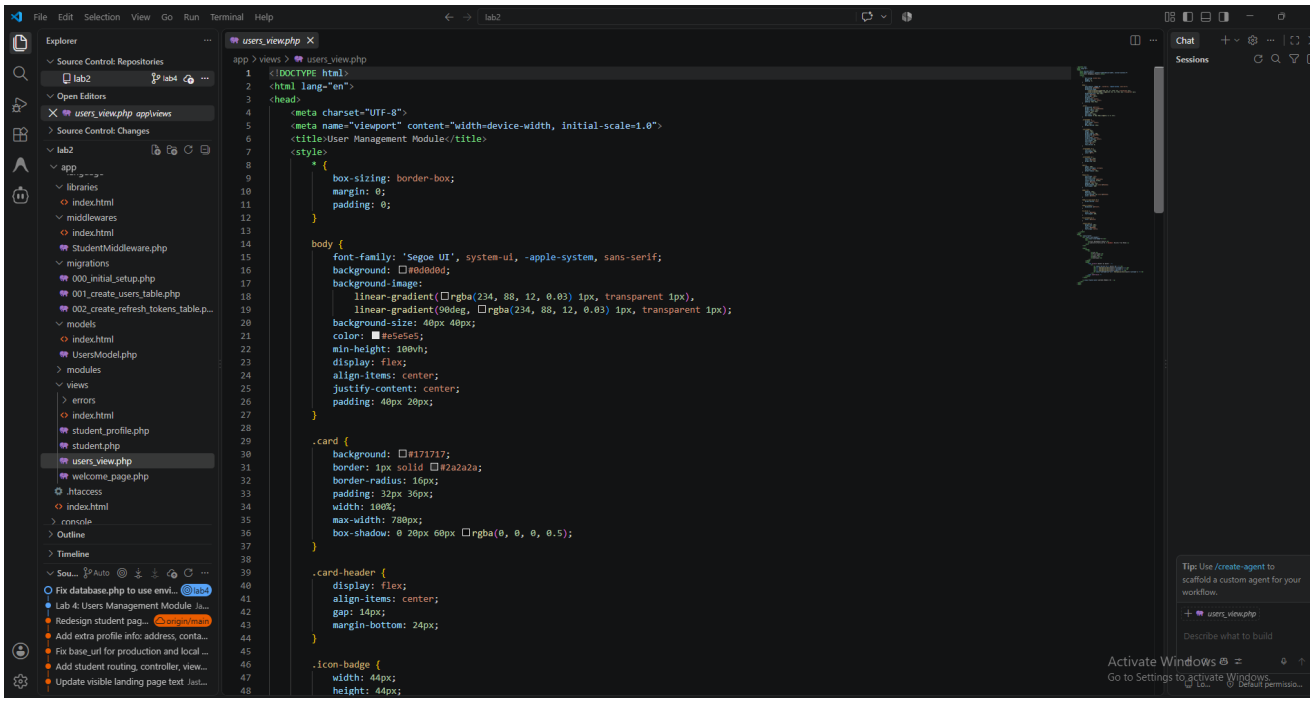

4. Controller Screenshot

app/controllers/UsersController.php — uses UsersModel's all() method:

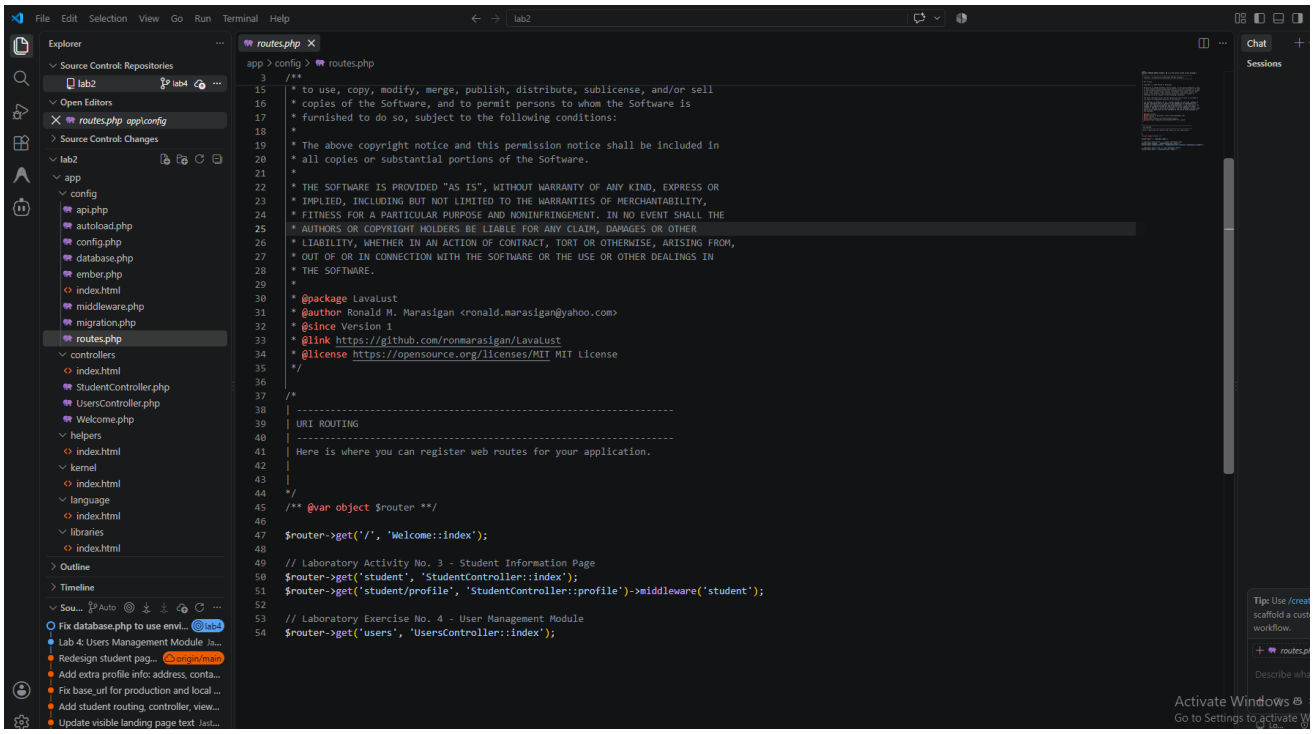

5. View Screenshot

app/views/users_view.php — loops through $users and builds the HTML table dynamically:

6. Route Screenshot

app/config/routes.php — /users route calling UsersController:

7. Application Output

Live application at https://opredo-jastine-lab4.onrender.com/index.php/users, displaying all 5 users dynamically retrieved from the MySQL database:
